Professional Summary

BSc in Computer Science & Engineering undergraduate at United International University (CGPA: 3.78/4.0), majoring in Data Science. Experienced in building NLP-driven applications, IoT-integrated AI systems, and production-grade full-stack platforms. Seeking a Data Science or Software Engineer role to design and deploy data-driven, real-world solutions.

Education

United International University (UIU)	Dhaka, Bangladesh
BSc in Computer Science & Engineering Major: Data Science CGPA: 3.78/4.0	2022 – Present
Dhaka College	2020
Higher Secondary Certificate (HSC) GPA: 5.00/5.00	
Government Laboratory High School	2018
Secondary School Certificate (SSC) GPA: 5.00/5.00	

Project Experience

Complete Legal Aid (CLA) – Legal Technology Platform 2025 – 2026
Frontend Lead & Full-Stack Contributor / React 19, TypeScript, Vite, Django, WebSocket, Tailwind CSS, Firebase, GCP

Live: completelegalaid.systems

- Solely engineered the entire frontend of a production-grade legal tech PWA – building role-based dashboards for 3 user types (Citizen, Lawyer, Admin), real-time chat UI, AI chatbot streaming interface, payment flow, booking system, analytics dashboards, and public landing pages
- Implemented the full real-time messaging system end-to-end – Django Channels & WebSocket backend through to React chat UI – with attachments, read receipts, and live push notifications via Firebase Cloud Messaging
- Built JWT & Google OAuth 2.0 authentication backend securing role-based access across 3 user types with token refresh and 2FA support
- Developed the AI-powered auto-drafting API reducing lawyer document drafting time from approximately 45 minutes to under 3 minutes – a 15x reduction through automated legal document generation

ChefMate – AI-Powered Recipe Suggestion Web App 2024
Solo Developer / Python, Flask, spaCy, scikit-learn, FuzzyWuzzy, Pandas

- Built an end-to-end AI recipe recommendation system using spaCy NLP (lemmatization + synonym handling) and FuzzyWuzzy for typo-tolerant matching, improving ingredient recognition accuracy by approximately 70% on noisy and varied user inputs
- Trained a scikit-learn classification model on a 643 MB Kaggle dataset to predict cuisine types and recipe names, delivering real-time results with confidence scores via a responsive Flask web interface
- Designed the full stack independently – from data preprocessing and ML model training to a live web UI with cuisine, diet, and meal-type filters

ConvoVerse – LLM-Based Multi-Agent Social Practice System 2024 – 2025
System Designer & Frontend Developer / TypeScript, React/Next.js, LLM APIs

- Designed a multi-agent LLM architecture with 3 AI roles and a graduated exposure model (Observer to One-on-One to Small Group), then built an interactive React frontend prototype with adaptive pacing, rewind-and-retry mechanics, and reflective feedback

- Coded all software modules independently – sensor data collection (DHT11, MQ-2, Pulse Sensor), real-time motor control, voice command recognition, and a Flask caregiver dashboard – on Raspberry Pi 4 as the AI core
- Integrated MobileNetSSD with OpenCV achieving real-time human detection at 60 fps on Raspberry Pi 4, enabling autonomous AI-driven patient tracking without manual control

Technical Skills

Languages: Python, Java, C, C++

AI / ML: scikit-learn, spaCy, OpenCV, Pandas, NumPy, NLP, Model Training & Evaluation, Data Preprocessing

AI Tools & Workflow: LLM Applications, Prompt Engineering (ChatGPT, Claude, Gemini), Jupyter Notebook, Google Colab

Frontend: React, Next.js, Vite, HTML5, CSS3, JavaScript, TypeScript, Bootstrap, Tailwind CSS

Backend: Django, Flask, Spring Boot, RESTful API Design

Database & Cloud: MySQL, Firebase Auth, Docker, Google Cloud Platform (GCP), Vercel

Embedded & IoT: Raspberry Pi 4, Arduino UNO, Sensors (DHT11, MQ-2), Actuators (Servo Motors), Motor Driver (L298N)

Core Concepts: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Linear Algebra, Statistics

Tools & Design: Git, GitHub, Postman, Notion, Ubuntu, VS Code, PyCharm, Figma, Adobe Illustrator

Human Languages: Bangla (Fluent) | English (Advanced – Reading & Writing, Intermediate – Speaking)

Achievements & Awards

- **Champion, UIU CSE Project Show Summer 2025 (System Analysis & Design)** – Awarded 1st place for UI/UX design of Complete Legal Aid platform among all university teams
- **3rd Runner-Up, UIU CSE Project Show Fall 2025 (Software Engineering)** – Recognised for software development of Complete Legal Aid among all university engineering teams
- **4th Runner-Up, UIU CSE Project Show 2024** – Recognised for AI + IoT innovation with Care Companion among all university engineering teams
- **3rd Place, Math & Physics Olympiad – Junior Level (BdMOC, 2016)** – Ranked 3rd in national-level junior competition demonstrating strong analytical aptitude
- Perfect GPA 5.00/5.00 in both SSC (2018) and HSC (2020) national public examinations

Extracurricular Activities

- **Executive Member, QCL (Quiz Club)** – Actively contributed to organising quiz competitions and club events at Government Laboratory High School (2015–2016)
- **Delegate, Asian Youth MUN & AYIMUN (2018–2019)** – Participated in international simulation conferences; developed research, negotiation, and public speaking skills
- **Member, British Council Bangladesh (2015–2018)** – Strengthened English communication and leadership through structured British Council programs
